IT Operations: Asset Inventory, Hardware Lifecycle Management, Root-Cause Analysis, Onboarding/Offboarding, PowerShell, Troubleshooting Documentation, Vendor Coordination, Microsoft Excel

PROFESSIONAL EXPERIENCE

IT Support Specialist — Service Desk Aug 2024 - Present
BAYSHORE COMMUNICATION • Tampa, FL(Remote)

- Managed 45–60 Tier 1 and Tier 2 incidents weekly for 500+ users across Windows and Mac desktop environments through ServiceNow, maintaining 95% SLA compliance and a 4.7/5 customer satisfaction rating.
- Administered user onboarding, role changes, and offboarding across Active Directory, Microsoft Entra ID, and Microsoft 365, handling account provisioning, password resets, MFA, and license assignments.
- Resolved hardware, Windows 10/11, Mac OS X, Microsoft 365, VPN, Wi-Fi, and network printer issues via phone, email, and remote access using Microsoft Quick Assist, achieving an 88% first-contact resolution rate.
- Imaged, deployed, and maintained 150+ PC and Mac hardware assets, mobile devices (iOS/Android), and peripherals using SCCM/MECM and Windows Autopilot, updating asset inventory in the CMDB.
- Authored and maintained 30+ technical documentation articles, troubleshooting guides, and standard support procedures, reducing average ticket-handling time by 15% and improving resolution consistency.
- Owned escalated tickets through resolution with 3rd level support and vendors, while coordinating conference room AV setups and troubleshooting Microsoft Defender for Endpoint antivirus software.

IT Technician Apr 2023 - Apr 2024
University at Buffalo • Buffalo, NY

- Managed a daily support queue and resolved 300+ 1st and 2nd level service requests through Salesforce and TeamDynamix, documenting troubleshooting steps and root-cause analysis for hardware and software issues.
- Delivered in-person deskside support and remote assistance for Windows and macOS endpoints, executing OS image deployments, workstation setups, software installations, and hardware replacements.
- Diagnosed and resolved computer network connectivity issues involving TCP/IP, DNS, DHCP, Wi-Fi, VPN, network printers, VoIP phones, and docking stations across campus facilities.
- Maintained accurate Microsoft Excel-based asset inventory and deployment records for laptops, peripherals, and replacement equipment, improving physical management of assets.
- Analyzed recurring technical issues and documented standardized troubleshooting procedures, contributing to a 60% reduction in repeat incidents and proposing continuous process improvements.

KEY PROJECTS

Led requirements gathering and workflow tracking using Azure DevOps. Designed a Microsoft Access relational database with queries and built Excel reporting to deliver actionable operational insights.

EDUCATION

B.S. in Management Information Systems (MIS) May 2026
University at Buffalo
